

Step by Step Process Execution

Step 1: Purchase Order Creation (ME21N)

- Create PO for QM-relevant material
- Vendor assigned
- Plant specified
- Save it, Purchase Order will be created.

Field	Value
Material	TEST_DMR_01
Plant	1000
Vendor	VEND_DMR_01

Step 2: Goods Receipt (MIGO)

- GR posted against PO (provide the above created purchase order)
- System automatically:
 - Creates **Inspection Lot**.
 - Posts stock to **Quality Inspection Stock**.

Step 3: Inspection Lot Creation (QA32)

- Provide the batch and material details, Inspection lot will be displayed.
- Confirms inspection characteristics

Step 4: Results Recording (QE51N / QE01)

- Inspector records results against characteristics.
- Results are compared with tolerance limits.

Step 5: Usage Decision (QA11)

- Quality team takes final decision
- Accept or Reject the lot.

Scenario	Action
Accepted	Post to Unrestricted
Rejected	Post to Blocked
Scrap	Scrap posting

Step 6: Stock Posting

- Stock moves automatically based on UD.

Step 7: Vendor Quality Evaluation

- Quality score updated.
- Used for future vendor selection.
